

Hand sketch:

Should you feel unsure with the choice of your [grip parameters](#), you may also send us a sketch of your hand shape by post, fax or email: [Contact](#)

- For this kindly place your shooting hand on a sheet of paper, as shown in this sketch.
- Draw a line around the contour of your hand with a thin ballpoint pen.
- In addition please draw a horizontal and vertical reference line on the sheet, each with a length of 10cm. This allows us to ascertain possible distortions during transmission by fax or scanner.
- If you send the sketch by email, please take care that the picture is stored with the original size (make a test print).
